FT1810

**FT1810 Floor Repeater Display**

The floor repeater display is an indication and operation unit in a fire detection system with following functions:

**Indication of events**

- Alarm
- Trouble

**Operation**

- Scrolling through lists
- Switch off buzzer

- Small floor repeater operating and display panels for use with the addressed FC18 fire detection system
- Large backlight LCD display(192X64 pixels) whose contrast can be set manually
- Communication with controller via FR18-BUS (individual addressing)
- Additional 24 VDC power supply necessary
- In total, up to 32 floor repeater displays can be connected to one FC18 fire control panel
- Flat, elegant housing

Operating voltage	24 VDC ±20%
Operating current (quiescent)	30 mA
Activation current	110 mA
Operating temperature	0 ... +42 °C
Storage temperature	-20 ... +60 °C
Humidity	≤95 % rel.
Communication protocol	FR18-BUS
Connection terminals	1.0 ... 1.5 mm <sup>2</sup>
Colour	white, RAL 9010
Protection category GB4208-93	IP30

Datasheet A6V10214500
